M ADIL LATIF

React Native Mobile App Developer

+92 3047968878 ⋄ adil.rao7968@gmail.com ⋄ linkedin/adilrao ⋄ github/adilrao364

OBJECTIVE

React Native developer with 3 years of experience in building scalable Android and iOS apps. Managed app deployment to stores with CI/CD automation's. Experienced in collaborating with large teams, with a focus on quality and successful project delivery.

SKILLS

Technical Skills	Javascript, Typescript, ReactJS, React Native, Expo, Redux-Toolkit, Firebase, APIs
Tools	Git, Android Studio, XCode, Claude AI, Bolt.new, chatGPT, Postman

WORK EXPERIENCE

Software Engineer (React Native)　　　　　　　　　　　　　　　　　　April 2024 - Present
AlphaSquad Technologies - Onsite　　　　　　　　　　　　　　　　　　　　　*Lahore, Pakistan*

- Designed and built dynamic apps using Typescript, React Native and Redux, improving UI consistency and reducing redesign efforts by **30%**.
- Followed Apple and Google design guidelines to deliver a **native look and feel**, increasing user satisfaction.
- Automated app builds using GitHub Actions and Maestro, cutting release time by **40%**.
- **Optimized performance** and state management (Redux Toolkit, Zustand) with **clean architecture**, while integrating third-party APIs, SDKs, and real-time features using Socket.IO.

Full-Stack Mobile App Developer　　　　　　　　　　　　　　　　　　　Nov 2022 - Feb 2024
Nordic Software Technologies FZE - Remote　　　　　　　　　　　　　　　　　　*Dubai, UAE*

- Delivered and published scalable apps using React Native, TypeScript, Expo, and Node.js to support a **service providing solution**.
- Designed **RESTful APIs** for Stripe, Google/Apple Pay, and OTP verification using Node.js.
- Used Redux-Toolkit Query for API caching, auto-refetching, and error handling to **boost performance**.
- Built push notifications, **real-time updates**, and a chat system using Firebase and Socket.io, improving user interaction.

Front-End Developer (React and React Native)　　　　　　　　　　　　　Jan 2022 - Feb 2023
XenCorps - Onsite　　　　　　　　　　　　　　　　　　　　　　　　　　　　*Lahore, Pakistan*

- Developed a scalable **e-commerce** web app using JavaScript and React.js with robust features and flexibility.
- Improved search and filter performance by over **70%** through optimized product filtering and searching.
- Reduced server load by implementing **debouncing and caching** to limit unnecessary API calls.
- Handled **role-based access** with protected and public routes for secure user authorization.

PROJECTS

QURB (Customer, Business, Admin)
Tech Used: Javascript, React, React Native, Expo, Nodejs, Firebase, REST APIs

- Built scalable **service providing apps** with secure payment Stripe, Apple Pay, and Google Pay integration, plus real-time user notifications and chat system.
- Developed RESTful APIs for auth, real-time analytics, payments, email, and SMS.
- Added smooth app navigation, booking flows, offers and dispute system.

Ship2Mate

Tech Used: Javascript, React, React Native, React Navigation

- Developed a social platform for **boat and crew services** with features like renting boats, hiring captains, posting stories, booking hotels, and making secure payments.
- Added user engagement tools including chat, push notifications, connection requests, memberships, and deep linking.

Muslims in World History

Tech Used: Typescript, React, React Native, Firebase

- Developed a **biography app** featuring offline access, text-to-speech, social login, and smooth animations for an engaging and accessible user experience.
- Added features like search, sort, and a follow system for personalized user interaction.

EDUCATION

Bachelor of Science in Software Engineering - CGPA : 3.21/4.00

Superior University, Lahore   2016 - 2020
